

Welcome at Christoph Mayer - **Expressive Baroque Music and more ... !**

“We create impressions, not simply results!”

This statement - with a bit of poster style - represents the essence of instrumentations and program concepts awaiting you at our homepage.

For our programs we look for and develop new and innovative concert forms that create a unique atmosphere and allow a direct contact with the audience.

“...With magical Melos and moving expressiveness!”

This concept should not distract from music but it will build a bridge between the audience and the musicians that impowers more active listening, rises attention for details and generally results in a stronger impression making a live concert still more valuable than a CD.

“...Vivid contrasts of joy and melancholy, fear and sentiments develop their irresistible magic from the very beginning”.

And yes, it's about emotions, about feelings that music is filled with or that it evokes in us. Musical description of emotions had been perfected to high arts in Baroque!

„... Their performing manner evokes images and moods that won't ever let you go. The thunder of applause is more than deserved”.

We play baroque music on period instruments and in historic performance practice because it's the best way how we can express the vividness, the innovation, the dramatic character and the emotions of this music.

Hope to meet you at our concerts!

See you,

Yours
